

Go Beyond Traditional Virtual Care with TytoCare™

Enhance Express Care Online with TytoCare's advanced diagnostic tools which brings in-person exam capabilities to virtual visits. Unlike traditional virtual care based on conversation and visual cues, TytoCare enables guided medical exams from home or work, delivering more accurate assessments and reducing the need for in-person visits. TytoCare devices are approved by Health Canada.

TytoClinic: Bring the Clinic to Your Workplace

TytoClinic turns any space in your office or worksite into a remote medical clinic, making it easy to offer high-quality virtual care on-site. Employees can have guided remote exams with a clinician, using diagnostic tools to check temperature, heart, lungs, ears, throat, and skin. TytoClinic supports employee health, reduces time away from work, and improves access to care—offering a convenient, cost-effective way to deliver personalized medical support during the workday.

TytoHome: Bring the Clinic to Your Home

TytoHome transforms basic virtual care into a more complete clinical experience from the comfort of home. The easy-to-use kit includes tools to measure temperature, capture images of the ears, throat, and skin, and listen to heart, lung, and abdominal sounds. TytoHome allows clinicians to assess a wider range of conditions remotely, helping reduce unnecessary in-person visits while delivering timely, personalized care for individuals and employees alike.

TytoHome vs TytoClinic: What's the Difference?

	TytoHome	TytoClinic
Best for	Individuals or families looking to enhance their virtual care service.	Workplaces, remote sites, and community locations seeking a complete, affordable on-site virtual care solution.
Setup	Portable, personal device used at home or on the go.	Fixed setup in a designated room at your workplace, remote work site, or other community facility.
Use cases	For checking non-urgent health issues from home with real-time guidance from a nurse practitioner during a virtual visit.	For convenient, on-site virtual care to assess non-emergency symptoms, with a nurse practitioner guiding the exam live.
What's included	Compact carrying case containing the Tyto device, charger, thermometer, stethoscope, otoscope, tongue depressor adapters, and corresponding disposable attachments.	Integrated station featuring the Tyto device, built-in monitor, and a drawer that holds all diagnostic adapters, including multiple disposable attachments for individual use.

Note: TytoHome and TytoClinic subscriptions are managed by Cleveland Clinic Canada and require an Express Care Online subscription. These products are not available in Quebec. Subscriptions have a two-year commitment and auto-renew annually. Saskatchewan Blue Cross members receive preferred pricing. Contact Cleveland Clinic Canada for details.
