

Worksheet: AI Myths vs. Facts

INSTRUCTIONS

For each statement below, write **Myth** or **Fact** in the space provided. Then, check your answers against the answer key at the bottom of this document and calculate your score.

Statement	Myth or Fact?
1. AI is only found in advanced robots.	_____
2. Streaming services use AI to personalize recommendations.	_____
3. AI systems never make mistakes.	_____
4. Checking privacy settings regularly can reduce AI-related risks.	_____
5. AI decisions are always neutral.	_____
6. Voice assistants like Siri and Alexa use AI.	_____
7. AI can predict the future with 100% accuracy.	_____
8. Facial recognition technology uses AI.	_____
9. AI is always expensive and inaccessible.	_____
10. AI can help detect fraud in financial transactions.	_____

Scoring guide: Give yourself 1 point for each correct answer and add up your points. _____ /10

✓ **8-10** = Excellent ✓ **5-7** = Good Understanding ✓ **Below 5** = Opportunity for Improvement

REMEMBER

AI is no longer futuristic; it is now woven into daily life. Understanding its types, capabilities and risks empowers you to use it both mindfully and responsibly. Focusing on informed decision-making, privacy and trusted sources gives you more control and confidence.

Answer Key

- | | |
|--|---|
| 1. Myth: AI is used in everyday tools like search engines and recommendation systems. | 4. Fact: Managing permissions helps protect your data. |
| 2. Fact: AI analyzes viewing patterns to suggest content. | 5. Myth: Bias in training data can influence AI decisions. |
| 3. Myth: AI can make errors due to biased data or incorrect algorithms. | 6. Fact: They rely on AI for speech recognition and responses. |
| | 7. Myth: AI predicts based on patterns, not certainty. |
| | 8. Fact: AI processes images to identify faces. |
| | 9. Myth: Many AI tools are free or built into everyday apps. |
| | 10. Fact: AI analyzes patterns to flag suspicious activity. |
